Frozen base detector
B-Free, CO-SPY or UnivFD
official code and weights
Frozen geometry models
MoGe-2: points, depth, intrinsics
Depth Anything V2: second depth
DSINE: normals from pixels
Intrinsic decomposition: shading
Frozen DINOv2-L (control)
CLS feature, PCA to
the geometry dimension
base logit
Explicit cues
G1 depth and normal agreement
G2 shading and geometry
G3 perspective
G4 occlusion and edges
26 features
DINOv2 PCs (M4, M5 only)
Logistic stacker
fit on the fit split
C by generator grouped CV
temperature, threshold
on the validation split
calibrated score
M1 base | M2 geometry
M3 base+geometry
M4 base+DINOv2 | M5 all
